SUMMARY

Senior Software Engineer with 4+ years of experience building and scaling Java-based microservices in enterprise environments. Proven track record of improving system performance (minutes to seconds), delivering reliable high-volume event-driven systems, and leading production-grade releases. Strong expertise in Spring, Kafka, Kubernetes, and cloud-native architecture, with a focus on performance, scalability, and clean system design.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python

Cloud & DevOps: Docker, Kubernetes, AWS, Jenkins

Frameworks: Spring Framework (Spring Boot, Spring Cloud)

Data & Messaging: MySQL, MongoDB, Apache Kafka

WORK EXPERIENCE

Senior Software Engineer

Toronto, Ontario

Sun Life Financial

Sept, 2025 - Present

- Led modernization of core enterprise applications, upgrading Java 8 → Java 21 and redesigning architecture to support multi-application workflows
- Cut processing latency from 3–7 minutes to ~10 seconds by migrating workloads to OpenShift and eliminating deployment/runtime bottlenecks
- Designed and built a Spring Boot REST API on AWS to automate data collection and streamline business workflows
- Improved system throughput and reliability by optimizing deployment pipelines and reducing runtime inefficiencies
- Collaborated cross-functionally with product/downstream teams to define requirements and ensure system integration
- Mentor junior engineers and contributed to code reviews, improving overall code quality and team velocity
- Improved observability by enhancing logging and monitoring, enabling faster issue detection and resolution
- Contributed to architectural decisions around microservices design and deployment strategies

Software Engineer

Toronto, Ontario

Sun Life Financial

April, 2023 - Sept 2025

- Built and maintained secure, scalable microservices for an enterprise eSign platform using Spring Boot in containerized environments (Docker, Kubernetes)
- Scaled Kafka-based event processing systems to handle 1000s of daily real-time document events with high reliability
- Improved system resilience by implementing retries, idempotency, and monitoring strategies, reducing failures
- Owned end-to-end release cycles (DEV → SIT → PROD), delivering production releases with zero critical defects
- Strengthened CI/CD pipelines and testing strategies to improve deployment confidence and stability

Associate Software Engineer

Toronto, Ontario

Sun Life Financial

March, 2022 - April 2023

- Delivered full-stack features in an agile environment using Java Spring, contributing to monthly production releases
- Reduced incident resolution time by 30% through deep production debugging and root cause analysis
- Resolved 500+ SonarQube issues, significantly improving code quality, maintainability, and system stability

QA Analyst

Toronto, Ontario

Tata Consultancy Services

April 2021 - Mar 2022

- Executed test plans and validated business-critical workflows to ensure high-quality releases

Junior Applications Support/Developer

Mississauga, Ontario

Flynn Group of Companies

April 2020 - April 2021

EDUCATION

BSc Computer Science

Toronto, Ontario

York University

Dec 2019

- *Vice President*, Humanity First Canada. Relevant Coursework: Advanced OOP, Advanced Data Structures & Algorithms, Database Systems, Operating System Fundamentals, Software Design, & User Interfaces
